Election/Restrictions

Examiner acknowledges Applicants election of species in paper no. 17. The species appears to fall within in the scope of Group I below. However, Examiner has determined in addition to the election of species, a restriction requirement is necessary. See restriction requirement below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9,12-22, drawn to a method of administering X-Y-Z compound to an animal or a human, classified in class 514, subclasses 506,613.
- II. Claims 10,11, drawn to a method of administering a hydroxy compound outside of the scope of X-Y-Z to an animal or a human, classified in class 514, subclass 724.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney J. Piotrowski on 7/16/03 to request an oral election to the above restriction requirement, but did not result in an election being made.
